

Portable Cellular Jammer

KJ103P is portable case-style jamming device designed to cover GSM and UMTS frequency bands.

Features:

- GSM900/1800 and UMTS800-2100 frequencies
- 3 separate frequency sets
- 3 separate Vertical polarized built-in antennas
- Passive cooling, no fans
- Directional antennas as an option
- Front panel operation
- Remote control
- Easy to operate
 - Switch Bands ON/OFF
 - Select preprogrammed frequency sets
- Field programmable
- Upgradable
- Customized solution upon request
 - Frequency plan/frequency set
 - Antenna set, antenna base
 - Supply voltage
 - Case mechanics

Applications:

- IED Jamming
- VIP security
- Hostile radio contact blocking

Specifications:

AC Voltage supply	176-264VAC, 47-63Hz
DC voltage supply	+12...+24V (negative ground)
Power consumption	150Wmax
Antenna interface	3x N female
AC supply interface	Standard IEC connector
DC supply interface	Multi-pin connector with lock function
Program interface	USB
Case type	Shock resistance plastic
Dimensions	371x258x152mm
Weight	8.7kg
