

PA210-50N is outdoor type directional panel antenna for frequency range 1920-2170MHz.

Key features:

- High gain 14.5dBi
- Wide range 1920-2170MHz
- Commonly used 50Ω impedance
- Wall mounting holes

Application areas:

- 3G/UMTS
- Radio systems

Technical specifications:

Type	Directional panel antenna
Frequency range	1920-2170 MHz
Gain	14.5 dBi
Beam width (3dB, H/E-plane)	25°/70°
VSWR	2:1 typical
Polarization	Linear, vertical (See figure above)
Connector	50Ω N-female
Enclosure type	Outdoor, wall mounting
Dimensions (max, without cable)	310x210x25mm
Color	Grey/Black
