

For restrictions on using jammers, please contact your national frequency regulator.

## Transportable Cellular Jammer

This transportable jammer covers cellular and GPS frequency bands. It's designed mainly for vehicle operation but can be used also as a stand-alone unit.

### FEATURES

- Vehicle or stand-alone installation
- GSM, UMTS, LTE and GPS frequency band coverage
- Software defined signals
  - Spot
  - Bandage
  - TDMA
- Separate frequency ranges
- Separate vertically polarized antenna set for frequency ranges
- Magnetic base or NATO base for antennas
- Directional antennas as option
- Remote control
- Malfunction alarm
- Easy to operate
- Switch bands ON/OFF
- Selectable preprogrammed frequency sets
- Field programmable
- Upgradable

### APPLICATIONS

- Communication jamming
- IED jamming
- VIP security

### CUSTOMIZABLE OPTIONS

- Frequency set
- Antenna set, antenna base
- Supply voltage
- Enclosure
