

PORTABLE JAMMER MJ-Compact

GENERAL DESCRIPTION

MJ-Compact is a portable jammer, that can transmit jamming signals at multiple bands. There are three and four band models available. Device is battery powered and can be controlled locally or remotely.

FEATURES

- Easy to use – no training required
- Portable, robust and durable housing
- Hot-swap battery
- Remote control available
- Fast switch-on time
- Low out-of-band emission
- In- and outdoor use

APPLICATIONS

- Hostile radio contact blocking
- Communication jammer
- IED jamming

PORTABLE JAMMER MJ-Compact

Available bands and output power

Parameter	Value
Number of bands	3 or 4
Configurable frequencies	WiFi, 2G, 3G, 4G, 5G, VHF, UHF, GNSS
Maximum continuous output power	10 W each band
Maximum burst output power	15 W each band

Physical specification (3 band)

Parameter	Value
Dimensions (WxDxH) (w/o antennas)	310 × 195 × 56 mm
Weight	2.5 Kg

Physical specification (4 band)

Parameter	Value
Dimensions (WxDxH) (3 band)	310 × 195 × 56 mm
Weight	3 Kg

Options

Name	Description
Battery	Multiple battery options available
Wireless remote	Remote controller using LoRa
Ethernet connectivity with software	Ethernet control adapter and remote jammer management software
