

Project "Digitalization and Increasing Efficiency of Rantelon Supply Chain Processes (20.1.01.24-0849)", 25.11.2024 - 30.11.2025

The project aims to digitalize Rantelon's supply chain through the implementation of a new ERP-MES software solution and its integration with other software and devices, which will result in a reduction in the need for human intervention, an increase in the company's digitalization, and an increase in the efficiency of the supply chain. The total cost of the project is 365,300 euros, of which own contribution is min 186,850 euros and support is max 178,450 euros.
